

CARR FARM EQUEST

INTOTAL

ISR/Oldenburg NA Approved Stallion KWPN – NA Affiliated Stallion

Single Dose Breeding Contract

1. Breeding contract for the purchase of a single breeding dose of frozen semen from Intotal.
2. Foals are eligible for the following books
 - a. ISR/Oldenburg NA
 - b. KWPN – NA Register A papers
3. The one dose will contain the correct number of straws for one (1) insemination over one (1) breeding cycle. Lodi Veterinary Care (LVC) will determine the number of straws, after each collection.
4. All the frozen semen is the property of Carr Farm Equest (CFE).
5. Frozen semen will be shipped using a vapor-shipping tank. Notify Carr Farm Equest at least 2 weeks ahead of plans to breed your mare.
6. Notify Lodi Vet Care at least 48 Hours requesting frozen stallion semen to be shipped your shipping address.
7. Rental charge for vapor tank is \$122.25 to be paid to Lodi Veterinary Care.
8. Semen is shipped using FedEx Priority and returned back to LVC using FedEx 2day.
9. Carr Farm Equest and Megan Dischler-Trainer nor Lodi Veterinary Care are not responsible for the semen once it leaves LVC, nor for late arrival or miss handling of straws.
10. For shipping the mare owner is strongly recommended to purchase their own insurance or use the FedEx insurance.
11. It is essential that the frozen semen be removed from the vapor shipper immediately upon arrival and stored in an appropriately frozen storage tank.
12. Vapor shipping tank must be returned to Lodi Veterinary Care within 2 business days of receipt at shipping address. There will be a charge of \$32.00 per day to the mare owner if it is late.
13. If vapor tank is not returned back to LVC within 30 days, a replacement fee of \$1500.00 will be charged to mare owner.
14. The Frozen Semen Breeding Report, signed by the veterinarian must be returned to Carr Farm Equest. ****

15. It is strongly recommended that a timed-insemination protocol using an effective ovulatory agent (e.g., hCG, Deslorelin) is used when breeding mares with frozen semen. It is recommended that insemination occur within 6 hours pre/post ovulatory determination or both.
16. The instructions will be given with the semen in the vapor container by Lodi Veterinary. It is recommended that you follow these instructions for thawing, re-warming and insemination of your mare.
17. Licensed veterinarian of your choice, or designated veterinary technician are the only persons to handle; transfer of straws to /from vapor tank or storage container.
18. Only Licensed veterinarian shall inseminate your mare.
19. Each breeding dose of semen is a minimum of 800 million sperm cells with mobility of 30%. The number of straws/breeding dose is determined by LVC, at time of each collection. Generally, there are 4-8 (0.5cc) straws per dose.
20. LIVE FOAL GUARANTEE (LFG)
21. Discount Prices Available
 - a. Discount option for no live foal guarantee.
 - b. Early breeding contract for first premium mares, and re-breeding of mares
22. Carr Farm Equest is to be notified once your foal is born.
23. If there is any remaining frozen semen and the mare owner would like to breed another mare with remaining semen, Carr Farm Equest must be notified prior to breeding. The mare owner agrees to pay the original breeding fee for each additional mare receiving semen.
24. If there is any remaining semen and the mare owner does not wish to breed another mare, the Veterinarian must contact Carr Farm Equest to determine disposition of remaining semen.
25. Attached with this document:
 - a. Carr Farm Equest – Frozen Semen By The Dose Contract
 - b. Client Information Sheet
 - c. Financial Summary
 - d. Mare Breeding Record Document. Owner/Handler to have filled out by veterinary once pregnancy confirmed, and send to Carr Farm Equest
26. Owner/Handler to request Vapor Shipper Rental Agreement from Lodi Veterinary Care. This is to be filled out, and sent back to Lodi Veterinary Care for semen shipment

Mare Breeding Record

Must be completed and returned when mare is bred

Mare Owners Name	_____		
Mare's Registered Name	_____	Mare's Barn Name	_____
Stallion's Name	_____		

I, the undersigned Veterinarian or Breeding Manager, certify the following:

- On the following dates I artificially inseminated the mare described above with the semen from the stallion Intotal.
- I personally verified the name of the stallion on the semen paperwork.
- No other mares were inseminated with the semen designated for the above mare.
- Remaining frozen semen remains the property of Carr Farm Equest. The veterinarian should contact Carr Farm Equest (319-231-2006) for instructions regarding the disposition of the remaining semen.

INSEMINATION RECORD		Pregnancy Record Required 14-16 days and 55-60 days post ovulation			
Insemination Date	Veterinarian's Signature	Date	In Foal	Not In Foal	Veterinarian's Signature
1		1			
2		2			
3		3			
4		4			

I have examined the mare listed above and found her to be **IN FOAL / NOT IN FOAL** (circle one) on this _____ day of _____ 2021. _____ Veterinarian's Signature

A Breeding Certificate will not be issued until Carr Farm Equest receives this document confirming mare's pregnancy status.
